

Working Group 2 Workshop Summary

ICT developments | Work Group Leader: Petre Lameski, Vice Leader: Michal Isaacson, Vice Leader: Kuldar Taveter

Funded by the Horizon 2020 Framework Programme
of the European Union.

11th of October 2018
Riga, Latvia

WG2: Agenda

- Current state of contributions from WG2 members
- Discussion and redefinition of the WG2 focusing groups
- Collection of search keywords for updated state of the art estimates
- Initial draft preparation for each focusing group
- General discussion

WG2: Redefined Focusing Groups

- Co-design/participatory design
- Adoption, accessibility, acceptance and legal
- Ambient living, wearables and sensors
- Supporting emotional well-being, people with cognitive disabilities and ADL
- Natural settings medical data analytics
- Solutions for caregivers, security and privacy

WG2: State of the art identification steps

WG2 Steps for each focusing groups:

- Identifying relevant keywords and search properties
- Semi automated quantitative analysis of the state of the art
- Qualitative analysis of state of the art literature for each focusing group

WG2: Conclusions

Expected results from each focusing group:

1. Quantitative analysis and visualization of the state of the art
2. Qualitative analysis based on WG members expertise and industry contributions (existing relevant projects)
3. Aggregation of the work done in the separate focusing groups in a single report for WG2
